Quality of Service - IWQoS 2005: 13th International Workshop, IWQoS 2005, Passau, Germany, June 21-23, 2005. Proceedings (Lecture Notes in Computer ... Networks and Telecommunications)

We welcome you to the proceedings of IWQoS 2005 held at the University of Passau, in the beautiful state of Bavaria, Germany. We hope that all attendees enjoyed their time in that ancient and historic city. Quality of Service(QoS) continues to be an important area of research. Traditionally very focused on the area of networking, it has grown to include mobile applications, wireless environments, 3G and 4G cellular networks, user experience, overlay networks, large-scale systems and other important areas of application. Six full-paper sessions that comprised selected papers of very high quality were devoted to the above mentioned, cutting-edge topics in this volume. We had a fascinating cross-disciplinary program and hope to have seeded connections between different disciplines and between industry and academia. In addition to the reviewed paper sessions, we were pleased to present two inspiring keynote speakers in this year's program: Randy Katz, University of California, Berkeley, USA, and Michael Stal, Siemens AG, Munich, Germany. One speaker being from academia and one from industry, reflected well the balanced view of this workshop. Both keynotes extended the scope of QoS and addressed pressing issues, such as "spam," and leading trends, such as "service orientation," and their relevance to QoS.
