A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry

Peter Szekeres

A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry Peter Szekeres

This book, first published in 2004, provides an introduction to the major mathematical structures used in physics today. It covers the concepts and techniques needed for topics such as group theory, Lie algebras, topology, Hilbert space and differential geometry. Important theories of physics such as classical and quantum mechanics, thermodynamics, and special and general relativity are also developed in detail, and presented in the appropriate mathematical language. The book is suitable for advanced undergraduate and beginning graduate students in mathematical and theoretical physics, as well as applied mathematics. It includes numerous exercises and worked examples, to test the reader's understanding of the various concepts, as well as extending the themes covered in the main text. The only prerequisites are elementary calculus and linear algebra. No prior knowledge of group theory, abstract vector spaces or topology is required.

From reader reviews:

Thomas Britton:

Nowadays reading books be a little more than want or need but also work as a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The information you get based on what kind of e-book you read, if you want send more knowledge just go with education and learning books but if you want experience happy read one having theme for entertaining such as comic or novel. Often the A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry is kind of e-book which is giving the reader unforeseen experience.

Sally Norman:

This A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry are generally reliable for you who want to be described as a successful person, why. The key reason why of this A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry can be one of many great books you must have is usually giving you more than just simple reading through food but feed you actually with information that might be will shock your preceding knowledge. This book will be handy, you can bring it everywhere and whenever your conditions in e-book and printed people. Beside that this A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry forcing you to have an enormous of experience like rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day task. So , let's have it and revel in reading.

James Walton:

Reading a book can be one of a lot of exercise that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new data. When you read a book you will get new information mainly because book is one of a number of ways to share the information or their idea. Second, studying a book will make you more imaginative. When you studying a book especially hype book the author will bring someone to imagine the story how the personas do it anything. Third, it is possible to share your knowledge to others. When you read this A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry, you are able to tells your family, friends and also soon about yours book. Your knowledge can inspire the others, make them reading a book.

Corey Johnson:

A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry can be one of your starter books that are good idea. We recommend that straight away because this e-book has good vocabulary which could increase your knowledge in vocabulary, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort that will put every word into

enjoyment arrangement in writing A Course in Modern Mathematical Physics: Groups, Hilbert Space and Differential Geometry but doesn't forget the main place, giving the reader the hottest as well as based confirm resource info that maybe you can be one among it. This great information can certainly drawn you into brand new stage of crucial contemplating.
