## **Microbial Inoculants in Sustainable Agricultural Productivity: Vol. 1: Research Perspectives**

How to achieve sustainable agricultural production without compromising environmental quality, agro-ecosystem function and biodiversity is a serious consideration in current agricultural practices. Farming systems' growing dependency on chemical inputs (fertilizers, pesticides, nutrients etc.) poses serious threats with regard to crop productivity, soil fertility, the nutritional value of farm produce, management of pests and diseases, agro-ecosystem well-being, and health issues for humans and animals. At the same time, microbial inoculants in the form of biofertilizers, plant growth promoters, biopesticides, soil health managers, etc. have gained considerable attention among researchers, agriculturists, farmers and policy makers.

The first volume of the book *Microbial Inoculants in Sustainable Agricultural Productivity - Research Perspectives* highlights the efforts of global experts with regard to various aspects of microbial inoculants. Emphasis is placed on recent advances in microbiological techniques for the isolation, characterization, identification and evaluation of functional properties using biochemical and molecular tools. The taxonomic characterization of agriculturally important microorganisms is documented, along with their applications in field conditions.

The book explores the identification, characterization and diversity analysis of endophytic microorganisms in various crops including legumes/ non-legumes, as well as the assessment of their beneficial impacts in the context of promoting plant growth. Moreover, it provides essential updates on the diversity and role of plant growth promoting rhizobacteria (PGPR) and arbuscular mycorrhizal fungi (AMF). Further chapters examine in detail biopesticides, the high-density cultivation of bioinoculants in submerged culture, seed biopriming strategies for abiotic and biotic stress tolerance, and PGPR as abio-control agent. Given its content, the book offers a valuable resource for researchers involved in research and development concerning PGPR, biopesticides and microbial inoculants.

### **From reader reviews:**

#### **William Martin:**

What do you concerning book? It is not important together with you? Or just adding material when you need something to explain what your own problem? How about your time? Or are you busy individual? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have time? What did you do? Everyone has many questions above. They must answer that question simply because just their can do that. It said that about book. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need that Microbial Inoculants in Sustainable Agricultural Productivity: Vol. 1: Research Perspectives to read.

#### **Brian Wilson:**

As people who live in typically the modest era should be upgrade about what going on or info even knowledge to make these people keep up with the era that is certainly always change and advance. Some of you maybe can update themselves by examining books. It is a good choice for yourself but the problems coming to an individual is you don't know which you should start with. This Microbial Inoculants in Sustainable Agricultural Productivity: Vol. 1: Research Perspectives is our recommendation to make you keep up with the world. Why, as this book serves what you want and need in this era.

#### **Daniel McCullough:**

Spent a free the perfect time to be fun activity to perform! A lot of people spent their leisure time with their family, or their own friends. Usually they doing activity like watching television, gonna beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? May be reading a book could be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the e-book untitled Microbial Inoculants in Sustainable Agricultural Productivity: Vol. 1: Research Perspectives can be great book to read. May be it might be best activity to you.

#### **Carol Williams:**

In this period of time globalization it is important to someone to receive information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of references to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The actual book that recommended to you personally is Microbial Inoculants in Sustainable Agricultural Productivity: Vol. 1: Research Perspectives this e-book consist a lot of the information from the condition of this world now. This book was represented how can the world has grown up. The language styles that writer require to explain it is easy to understand. The particular writer made some analysis when he makes this book. That is why this book ideal all of you.
