Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery)

Geoffrey Barbier, Zhuo Feng, Pritam Gundecha, Huan Liu

Social media shatters the barrier to communicate anytime anywhere for people of all walks of life. The publicly available, virtually free information in social media poses a new challenge to consumers who have to discern whether a piece of information published in social media is reliable. For example, it can be difficult to understand the motivations behind a statement passed from one user to another, without knowing the person who originated the message. Additionally, false information can be propagated through social media, resulting in embarrassment or irreversible damages. Provenance data associated with a social media statement can help dispel rumors, clarify opinions, and confirm facts. However, provenance data about social media statements is not readily available to users today. Currently, providing this data to users requires changing the social media infrastructure or offering subscription services. Taking advantage of social media features, research in this nascent field spearheads the search for a way to provide provenance data to social media users, thus leveraging social media itself by mining it for the provenance data. Searching for provenance data reveals an interesting problem space requiring the development and application of new metrics in order to provide meaningful provenance data to social media users. This lecture reviews the current research on information provenance, explores exciting research opportunities to address pressing needs, and shows how data mining can enable a social media user to make informed judgements about statements published in social media. Table of Contents: Information Provenance in Social Media / Provenance Attributes / Provenance via Network Information / Provenance Data

From reader reviews:

Shirley Dildy:

Book is to be different for every grade. Book for children until eventually adult are different content. As it is known to us that book is very important for all of us. The book Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) has been making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The e-book Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) is not only giving you considerably more new information but also to get your friend when you truly feel bored. You can spend your own personal spend time to read your publication. Try to make relationship with all the book Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery). You never feel lose out for everything if you read some books.

Enrique Hayes:

This Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) book is just not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is actually information inside this book incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This kind of Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) without we recognize teach the one who looking at it become critical in contemplating and analyzing. Don't be worry Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) can bring any time you are and not make your bag space or bookshelves' grow to be full because you can have it within your lovely laptop even phone. This Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) having great arrangement in word in addition to layout, so you will not really feel uninterested in reading.

Jeremy Richards:

The knowledge that you get from Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) is the more deep you searching the information that hide inside the words the more you get serious about reading it. It does not mean that this book is hard to comprehend but Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) giving you excitement feeling of reading. The writer conveys their point in selected way that can be understood by simply anyone who read the item because the author of this publication is well-known enough. This particular book also makes your vocabulary increase well. Making it easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having this Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) instantly.

Carl Johnson:

Information is provisions for people to get better life, information today can get by anyone on everywhere.

The information can be a know-how or any news even a problem. What people must be consider whenever those information which is inside former life are difficult to be find than now could be taking seriously which one would work to believe or which one the particular resource are convinced. If you have the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Provenance Data in Social Media (Synthesis Lectures on Data Mining and Knowledge Discovery) as your daily resource information.
