## High Magnetic Fields: Applications in Condensed Matter Physics and Spectroscopy (Lecture Notes in Physics)

This book is addressed to all scientists interested in the use of high magnetic fields and in the use of high-field facilities around the world. In particular it will help young scientists and newcomers to the topic to gain a better understanding in areas such as condensed matter physics, in which the magnetic field plays a key role either as a parameter controlling the Hamiltonian, or as an experimental tool to probe the underlying mechanism. This concerns mostly strongly correlated and (or) low dimensional systems. Rather than covering all these subjects in detail, the philosophy here is to give essential physical concepts in some of the most active fields, which have been quickly growing in the last ten to twenty years. Besides its role as a physical parameter in condensed matter physics, a large magnetic field is essential to Electron Paramagnetic Resonance (EPR) and Nuclear Magnetic Resonance (NMR) spectroscopies. The state of art of high resolution NMR in liquids and solids and high frequency EPR applied to fields like chemistry and biology are also reviewed in this volume. The first series of chapters is devoted to the integer and the Fractional Quantum Hall Effects (FQHE) in two-dimensional electron systems. C. Glattli brushes an historical background and a comprehensive review of transport phenomena in these systems, including recent developments on the mesoscopic electronic transport at the edges of quantum Hall samples, chiral Luttinger liquids and fractional excitations. R.

### **From reader reviews:**

#### **Fernando Rowe:**

In this 21st century, people become competitive in every single way. By being competitive now, people have to do something to make all of them survive, being in the middle of often the crowded place and notice by simply surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. That's why, by reading a guide your ability to survive boost then having chance to remain than other is high. For you who want to start reading a new book, we give you that High Magnetic Fields: Applications in Condensed Matter Physics and Spectroscopy (Lecture Notes in Physics) book as nice and daily reading book. Why, because this book is more than just a book.

#### **Troy Munoz:**

A lot of people always spent all their free time to vacation or go to the outside with their family members or their friend. Were you aware? Many a lot of people spent that their free time just watching TV, as well as playing video games all day long. If you wish to try to find a new activity that is look different you can read the book. It is really fun in your case. If you enjoy the book that you simply read you can spend all day long to reading a e-book. The book High Magnetic Fields: Applications in Condensed Matter Physics and Spectroscopy (Lecture Notes in Physics) it is rather good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. Should you did not have enough space to create this book you can buy the particular e-book. You can more simply to read this book from a smart phone. The price is not to fund but this book provides high quality.

#### **Bruce Bracey:**

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you never know the inside because don't judge book by its cover may doesn't work is difficult job because you are afraid that the inside maybe not since fantastic as in the outside look likes. Maybe your answer is usually High Magnetic Fields: Applications in Condensed Matter Physics and Spectroscopy (Lecture Notes in Physics) why because the excellent cover that make you consider about the content will not disappoint a person. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly make suggestions to pick up this book.

#### **Amy Terrell:**

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from the book. Book is composed or printed or outlined from each source this filled update of news. With this modern era like today, many ways to get information are available for a person. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just in search of the High Magnetic Fields: Applications in Condensed Matter Physics and Spectroscopy (Lecture Notes in

Physics) when you needed it?
