## eWork and eBusiness in Architecture, Engineering and Construction: ECPPM 2012

Since 1994, the European Conferences of Product and Process Modelling ([www.ecppm.org](http://www.ecppm.org)) have provided a review of research, development and industrial implementation of product and process model technology in the Architecture, Engineering, Construction and Facilities Management (AEC/FM) industry.

Product/Building Information Modelling has matured significantly in the last few years and has never been closer to having a permanent impact on the AEC/FM industry as a mainstream technology. In this context the 9th European Conference of Product and Process Modelling provided a forum for leading experts to discuss the latest achievements, emerging trends and future directions in product and process modelling technology in this dynamic and fragmented industry, focusing on integrated project working, value-based life cycle management and intelligent and sustainable buildings and construction. **eWork and eBusiness in Architecture, Engineering and Construction 2012** provides a comprehensive overview of topics including BIM in all life-cycle stages, ICT for energy efficiency, smart buildings and environmental performance, energy and building simulation, knowledge and semantic modelling, visualization technologies as well as tools and methods to support innovations in design and construction processes. It further includes the proceedings of the **3rd Workshop on eeBuildings Data Models (Energy Efficiency Vocabularies)**, which aim to identify ICT Energy Efficiency Vocabularies and Ontologies to foster interoperability of Energy Efficiency Management Systems.

**eWork and eBusiness in Architecture, Engineering and Construction 2012** will be of interest to academics and professionals working in the interdisciplinary area of information technology in architecture, engineering and construction.
