Innovative Research in Attention Modeling and Computer Vision Applications (Advances in Computational Intelligence and Robotics)

Rajarshi Pal

Innovative Research in Attention Modeling and Computer Vision Applications (Advances in Computational Intelligence and Robotics) Rajarshi Pal

Robotics and autonomous systems can aid disabled individuals in daily living or make a workplace more productive, but these tools are only as effective as the technology behind them. Robotic systems must be able to accurately identify and act upon elements in their environment to be effective in performing their duties.

Innovative Research in Attention Modeling and Computer Vision Applications explores the latest research in image processing and pattern recognition for use in robotic real-time cryptography and surveillance applications. This book provides researchers, students, academicians, software designers, and application developers with next-generation insight into the use of computer vision technologies in a variety of industries and endeavors.

This premier reference work includes chapters on topics ranging from biometric and facial recognition technologies, to digital image and video watermarking, among many others.

From reader reviews:

Jocelyn Welch:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a wander, shopping, or went to often the Mall. How about open or maybe read a book eligible Innovative Research in Attention Modeling and Computer Vision Applications (Advances in Computational Intelligence and Robotics)? Maybe it is for being best activity for you. You understand beside you can spend your time using your favorite's book, you can cleverer than before. Do you agree with it is opinion or you have other opinion?

Connie Deroche:

As people who live in the particular modest era should be change about what going on or details even knowledge to make these keep up with the era which can be always change and move ahead. Some of you maybe can update themselves by examining books. It is a good choice to suit your needs but the problems coming to you is you don't know what type you should start with. This Innovative Research in Attention Modeling and Computer Vision Applications (Advances in Computational Intelligence and Robotics) is our recommendation to help you keep up with the world. Why, because this book serves what you want and want in this era.

Sara Jones:

Hey guys, do you really wants to finds a new book to study? May be the book with the title Innovative Research in Attention Modeling and Computer Vision Applications (Advances in Computational Intelligence and Robotics) suitable to you? The particular book was written by renowned writer in this era. The particular book untitled Innovative Research in Attention Modeling and Computer Vision Applications (Advances in Computational Intelligence and Robotics)is the main one of several books which everyone read now. This book was inspired many men and women in the world. When you read this guide you will enter the new dimension that you ever know before. The author explained their idea in the simple way, thus all of people can easily to know the core of this guide. This book will give you a wide range of information about this world now. So you can see the represented of the world in this book.

Vincent Mickens:

A lot of publication has printed but it differs. You can get it by online on social media. You can choose the very best book for you, science, amusing, novel, or whatever by means of searching from it. It is known as of book Innovative Research in Attention Modeling and Computer Vision Applications (Advances in Computational Intelligence and Robotics). You can add your knowledge by it. Without leaving the printed book, it can add your knowledge and make you actually happier to read. It is most crucial that, you must aware about guide. It can bring you from one destination for a other place.
