Spatial and Syndromic Surveillance for Public Health

Spatial and Syndromic Surveillance for Public Health

Following the events of 9/11 and in the current world climate, there is increasing concern of the impact of potential bioterrorism attacks. Spatial surveillance systems are used to detect changes in public health data, and alert us to possible outbreaks of disease, either from natural resources or from bioterrorism attacks. Statistical methods play a key role in spatial surveillance, as they are used to identify changes in data, and build models of that data in order to make predictions about future activity.

This book is the first to provide an overview of all the current key methods in spatial surveillance, and present them in an accessible form, suitable for the public health professional. It features an abundance of examples using real data, highlighting the practical application of the methodology. It is edited and authored by leading researchers and practitioners in spatial surveillance methods. Provides an overview of the current key methods in spatial surveillance of public health data. Includes coverage of both single and multiple disease surveillance. Covers all of the key topics, including syndromic surveillance, spatial cluster detection, and Bayesian data mining.

This great information could drawn you into fresh stage of crucial thinking.

Sherri King:

As a college student exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some publication, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the professor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that reading through is not important, boring in addition to can't see colorful images on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Spatial and Syndromic Surveillance for Public Health can make you really feel more interested to read.
