*Ralph Martin, Colleen Sexton, Jack Gerlovich*

**Science for All Children: Methods for Constructing Understanding (2nd Edition)** Ralph Martin, Colleen Sexton, Jack Gerlovich

This paperback is composed of strategies and methods to provide teachers with an inquiry approach to promote the teaching of the concepts, skills, and attitudes of science in the classroom. This book is derived from the successful third edition of *Teaching Science for All Children* by the same author team. The authors have taken their popular 4E Learning Cycle (Exploration, Explanation, Expansion and Evaluation) teaching method and applied it throughout this edition. Continuing to incorporate the National Science Education Standards, the authors provide ways for teachers to foster an awareness among their students of the nature of science. This books allows them to implement skills in the classroom using science inquiry processes and develop in their students an understanding of the interactions among science, technology, and society. For pre-service and in-service elementary and middle school teachers.
