**Alienated: The Search For Extraterrestrial Life** Stuart Carapola

In an infinitely large universe, containing billions upon billions of star systems, every measure of probability says that we should have made contact with alien life by now. But if that's the case, how come we not only haven't made contact with extraterrestrials, but have yet to even see a single shred of evidence that they exist at all?

Alienated: The Search For Extraterrestrial Life explores the many reasons we appear to be alone in a universe that should be teeming with life...even if we're not.
