Coercive diplomacy - the use of threats and assurances to alter another state's behavior - is indispensable to international relations. Most scholarship has focused on whether and when states are able to use coercive methods to achieve their desired results. However, employing game-theoretic tools, statistical modeling, and detailed case study analysis, *Power Plays* builds and tests a theory that explains how states develop strategies of coercive diplomacy, how their targets shield themselves from these efforts, and the implications for interstate relations. Focusing on the World Trade Organization, *Power Plays* argues that coercive diplomacy often precludes cooperation due to fears of exploitation, but that international institutions can solve these problems by convincing states to eschew certain tools for coercive purposes.
